# Coming up next...

## The Village 3

Memes for a Regenerative Economy

Kate Raworth - Author,  
Doughnut Economics;  
Co-Founder, Doughnut  
Economics Action Lab

Joe Brewer - Community  
Catalyst, Regenerative  
Communities Network,  
Capital Institute

Kate Raworth will discuss the importance of the Doughnut as a meme for spreading understanding of thresholds -- the "outer limits" or ecological ceilings and the "inner limits" of social foundations (to borrow from the concepts first established by Barbara Ward in the 1974 UNEP / UNCTAD "Cocoyoc Declaration").

Joe Brewer will present a brief history of the development of economic theory in the late 19th Century, predicated on linear thermodynamic mathematics, failing to adapt to developments in the 20th Century in non-linear thermodynamic mathematics. This bridges to his current work as the Community Catalyst for the Capital Institute Regenerative Communities Network.

We hope to see you at the 6th International  
Reporting 3.0 Conference - Implementing Thriveable  
Transformation - in Rotterdam 17-18 June 2019.
